CHEMSTREAM @ GLASSPRINT 2019

ChemStream attended the GlassPrint conference in Düsseldorf (27-28/11/2019) with a booth and a lecture on "The Adhesion of UV-curable Inkjet Inks and Coatings on Glass".

It was an interesting experience for us as many contacts could lead to promising collaborations in the future in the field of printing and coating on glass.

Insight in the lecture of Marin Steenackers can be found [here](#).
